UTILIZING JOC FOR CITY CONSTRUCTION PROJECTS

For all proposed projects please complete items 1 and 2 below. As appropriate, complete items 3, 4 and 5.

(Attach to the MOA)

1. Please describe the major features of the project:

See Attached Memo Authorization Letter.

2. Please explain why this project could not be bid using the City's traditional bid process and the need to use the JOC procurement system:

The existing chlorine evaporators operate from power supplied by the plant's steam driven system. Currently two important components of the steam system(Deaerator and Blowdown Tanks)must be replaced before the start of the winter season so the boilers can provide an adequate heated environment for plant occupants. Therefore, installation of the new electrically powered chlorine evaporators(No longer requiring steam power) must be completely done(Including this additional workscope-Project no. 01-03-007A)prior to the start of work on JOC Project No. 01-03-008(Replacement of Deaerator and blowdown tanks).

3. If this project is a one trade project, please provide additional explanation of why it would be in the City's best interest to do the project under JOC:

N/A

4. If it is anticipated that over 25% of the project will be non-prepriced, please provide an explanation on why JOC should be used:

N/A

5. If some elements of the proposed JOC project scope of work are covered by City Term Agreements, these elements should be removed from the JOC project scope of work. If it is not desirable to do so, please explain:

N/A
